Discover the Healing Power of Hyperbaric Oxygen Therapy (HBOT) in the Vitaeris 320 OxyHealth Chamber

About Us

At Capitol Spine & Rehabilitation and Disc Center of America – Baton Rouge, we offer state-of-the-art Hyperbaric Oxygen Therapy (HBOT) using the **Vitaeris 320 OxyHealth Chamber**. This advanced chamber provides a comfortable and effective environment for healing and recovery, delivering 90-95% oxygen under pressure to enhance your body's natural healing processes.

What is Hyperbaric Oxygen Therapy?

During HBOT, patients relax in a pressurized chamber while breathing pure oxygen. The increased atmospheric pressure allows oxygen to dissolve more efficiently into the blood plasma, reaching tissues and cells that need it most.

Benefits of HBOT

- Accelerates Healing:** Improves blood flow and tissue regeneration, aiding recovery from injuries, wounds, and inflammation.
- Enhances Brain Recovery:** Supports cognitive improvements for traumatic brain injury (TBI) and post-concussion symptoms.
- Reduces Pain and Swelling:** Decreases inflammation, relieving chronic pain conditions.
- Boosts Immunity:** Helps fight infections, including antibiotic-resistant ones.
- Improves Quality of Life:** Enhances energy, focus, and overall wellness.

Scientific Evidence

1. Traumatic Brain Injuries (TBI):

A study in *PLoS One* (2013) demonstrated significant improvement in cognitive function and quality of life in patients with mild TBI after HBOT. The therapy showed measurable benefits in neuroplasticity and reduced post-concussion symptoms.

2. Wound Healing:

Research published in *Advances in Wound Care* (2019) highlights HBOT's effectiveness in treating chronic wounds by increasing oxygenation to hypoxic tissues, promoting faster healing.

3. Anti-Inflammatory Effects:

A study in *Critical Care Medicine* (2016) found that HBOT reduces systemic inflammation, improving recovery in conditions like arthritis and autoimmune disorders.

Patient Testimonial

“Before starting HBOT, I struggled daily with brain fog, fatigue, and headaches from a car accident. After just a few sessions in the Vitaeris 320 chamber, I began to notice a difference. My headaches subsided, my energy returned, and I finally felt like myself again. This treatment has been life-changing for my recovery.” – Sarah W.

Why Choose the Vitaeris 320 OxyHealth Chamber?

- Spacious design for patient comfort
- Safe and non-invasive treatment
- Perfect for individuals seeking faster recovery and enhanced wellness

Take the next step toward healing and recovery with Hyperbaric Oxygen Therapy at our clinic.
